Work Experience

A list of both my prior and current work experience. Includes only relevant 'technical' jobs related to software development.

Software Developer

Organisation Name	Barclays
Duration & Date	Jun 2018 - Present

Job Title Software Developer (Java)

Description

Graduate job. Most of my time is spent developing RESTful SpringBoot web applications in Java and Kotlin. Practices include TDD, DDD and the use of Gradle, Junit, Tomcat and working with legacy code. I also developed user-interfaces in ReactJS with TypeScript. Awarded best newcomer in December 2018 and promoted in August 2019.

MEAN Stack Developer

Organisation Name Urban Sensing Ltd. / Biodata
Duration & Date 1 Year, 2 Mo. May 2017 – Jun 2018
Job Title MEAN Stack Developer
Description

Year 2 University Summer placement. Working with Vanilla JavaScript, jQuery, the D3.JS JavaScript Library and MongoDB in order to graphically visualise data collected from public vehicles around the world. Working in the MEAN Stack (MongoDB, ExpressJS Framework, AngularJS, NodeJS). I switched from a full-time to a part-time contract when I started my final year at University.

Web Developer

Organisation Name Ocean82 / Peer Preference
Duration & Date 4 Months. Jun 2016 – Sept 2016
Job Title Web Developer
Description

Year 1 University Summer placement. I was tasked with designing and creating multiple websites in WordPress. I gained experience with Microsoft Server 2008/2012 and its Internet Information Services (IIS) Manager. I was involved with both front and back end development. This included working with MSSQL, MySQL and PHP for server side and back-end database work. And the use of HTML, CSS, JS and AJAX for client side and front-end web development.

Technical Skills

A list of some of the relevant technical skills acquired from work-experience, my time at University, and personal projects.

Software Development

Programming Languages Java & Kotlin
JavaScript & TypeScript

Practices Test-Driven Development

Domain-Driven Design
